Respectful, Engaged and Active Learners

## MHS YEAR 7 STUDENTS

### What is an assessment task and why is it so important?

Assessment is the opportunity to show what **you know** and what **you can do**.

Your assessment tasks will help to diagnose your strengths and weaknesses so that teachers can focus their teaching on what you need to learn to be successful at school. You will also find out about areas to concentrate on to improve.

There are assessment tasks in each subject. This will happen in each year of high school and you will be able to access the information in this booklet on the school website: [www.mitchell-h.schools.nsw.edu.au](http://www.mitchell-h.schools.nsw.edu.au)

The tasks that you will complete could be:

- formal examinations
- tests
- assignments
- essays
- creative works
- field studies
- excursion reports
- in-class assessment task.

All assessment tasks contribute towards your achievement and grades and must be completed. The results of this work will be shown in your Half Yearly and Yearly Reports. In-class, you will be given a sheet showing you the assessment schedule for each subject. It will tell you when each assessment task will be held, what you will be assessed on, and what the task is worth. This sheet will be pasted into your exercise book so that you can refer to it throughout the year. You may obtain advice regarding your assessments from your teacher or the Head Teacher of the subject.

**Please remember, you are also required to complete classwork and homework.**

**The Year 7 Assessment Handbook is available on the school's website and Sentral Portal:**

# THE SCHOOL'S RESPONSIBILITIES

---

## The school's responsibility

- Setting relevant, high quality tasks to measure student performance in each subject
- Providing a criteria which will be used to assess the task
- Providing the outcomes which will be assessed in the task
- Adhering to the published assessment task schedule and specifying the mark value for each task
- Using school assessment task proforma for the publication of tasks and ensuring consistency in presentation of information across all subjects
- Maintaining a record of each student's performance on each task and reporting on it
- Providing students with information on their progress

### Please note:

The School reserves the right to make any changes considered necessary after this handbook has been issued. The changes will be advised in writing two weeks prior to the due date of the assessment task affected.

### To complete the assessment task you will need to:

- Carefully read the assessment task issued on the school's proforma and available on your student portal
- Plan and mark the due dates for the tasks in your homework diary and the calendar at the end of this book
- Break the task into small manageable parts and complete it gradually
- Organise any notes, materials and resources that you are using
- Complete any research and keep a list of resources used (bibliography)
- Speak to your teacher if you need help and to check how you are going
- Check that any technology or equipment needed to complete the task is working before the due date
- Correct drafts and complete your presentation
- Complete the feedback/evaluation sheet on your performance on the task
- Keep your drafts in case something happens
- Put your task or any equipment you will need to complete the task in your bag the night before it is due
- Keep a record of your submission of the task
- Keep a record of your results

## Late Regulations

### If you do not complete the task on the due date, you will need to do the following:

Give your class teacher or the Head Teacher of the subject a note from your parents / carers explaining why your assessment task has not been done on the first day back at school after an absence. **If you have a medical certificate this will explain the reason and no penalty will apply.** Bring in your drafts as evidence of attempting the task.

### Please note:

- Unexplained absences are unacceptable because it is a deliberate attempt to advantage yourself.
- Technology failure is not an excuse for late submission of tasks.
- The task must still be handed in and a penalty of 25% of the marks gained each calendar day will be applied. The task will be marked and you will still benefit from the teachers' feedback.

# COMMONLY ASKED QUESTIONS

---

## **What if you know in advance that you will be absent?**

If you know that you will be absent with sufficient reason e.g. a funeral, an approved school activity or urgent medical attention, you will need to explain the circumstances in a note, before the absence, to your class teacher and a new due date will be given.

## **What if you have been absent from school?**

When you have missed a lesson, it is your responsibility to check with your class teacher or peers to see if any relevant information about an assessment task has been provided and arrange to catch up the work.

## **What happens when you hand in an assessment task?**

Your class teacher will keep records of the assessment task completed and handed in. An assessment task receipt sheet will be used. In a formal examination, you will complete an examination attendance slip for each subject.

## **Malpractice**

Malpractice is any activity undertaken by a student that allows them to gain an unfair advantage over others.

### **Malpractice includes, but is not limited to:**

- Copying someone else's work in part or in whole, and presenting it as your own;
- Using words, ideas, designs or the workmanship of others in practical and performance tasks without appropriate acknowledgement;
- Using material directly from books, journals, CDs or the internet or any other source without reference to the source;
- Building on the ideas of another person without referring to the source;
- Buying, stealing or borrowing another's work and presenting it as your own;
- Damaging another student's work;
- Paying for having someone else complete the task for you;
- Submitting work which another person such as a parent, tutor, subject expert or a sibling has contributed to substantially;
- Breaking published school examination rules;
- Using non approved aides during an assessment task;
- Providing false explanations for work not handed in by the due date;
- Assisting another student to engage in malpractice.

## **What if you copy other people's work?**

A **zero** penalty will be imposed for copying, plagiarism or having someone else do the work for you.

## **What if you do not make a serious attempt or cheat?**

A **zero** penalty will be imposed if you do not make a serious attempt in an assessment task, produce irrelevant or offensive material, or cheat.

### **Please note**

Parents will be informed of any instances of malpractice.

## Mathematics Outcomes

**A student:**

<b>MA4-1WM</b>	communicates and connects mathematical ideas using appropriate terminology, diagrams and symbols
<b>MA4-2WM</b>	applies appropriate mathematical techniques to solve problems
<b>MA4-3WM</b>	recognises and explains mathematical relationships using reasoning
<b>MA4-4NA</b>	compares, orders and calculates with integers, applying a range of strategies to aid computation
<b>MA4-5NA</b>	operates with fractions, decimals and percentages
<b>MA4-6NA</b>	solves financial problems involving purchasing goods
<b>MA4-7NA</b>	operates with ratios and rates, and explores their graphical representation
<b>MA4-8NA</b>	generalises number properties to operate with algebraic expressions
<b>MA4-9NA</b>	operates with positive-integer and zero indices of numerical bases
<b>MA4-10NA</b>	uses algebraic techniques to solve simple linear equations
<b>MA4-11NA</b>	creates and displays number patterns; graphs and analyses linear relationships; and performs transformations on the Cartesian plane
<b>MA4-12MG</b>	calculates the perimeters and area of plane shapes.
<b>MA4-13MG</b>	uses formulas to calculate the areas of quadrilaterals and circles, and converts between units of area
<b>MA4-14MG</b>	uses formulas to calculate the volumes of prisms and cylinders, and converts between units of volume
<b>MA4-15MG</b>	performs calculations of time that involve mixed units, and interprets time zones
<b>MA4-16MG</b>	applies Pythagoras' theorem to calculate side lengths in right-angled triangles, and solves related problems
<b>MA4-17MG</b>	classifies, describes and uses the properties of triangles and quadrilaterals, and determines congruent triangles to find unknown side lengths and angles
<b>MA4-18MG</b>	identifies and uses angle relationships, including those related to transversals on sets of parallel lines
<b>MA4-19SP</b>	Collects, represents and interprets single sets of data, using appropriate statistical displays
<b>MA4-20SP</b>	Analyses single sets of data using measures of location, and range

Science Outcomes	
<b>A student:</b>	
<b>SC4-1VA</b>	appreciates the importance of science in their lives and the role of scientific inquiry in increasing understanding of the world around them
<b>SC4-2VA</b>	shows a willingness to engage in finding solutions to science-related personal, social and global issues, including shaping sustainable futures
<b>SC4-3VA</b>	demonstrates confidence in making reasoned, evidence-based decisions about the current and future use and influence of science and technology, including ethical considerations
<b>SC4-4WS</b>	identifies questions and problems that can be tested or researched and makes predictions based on scientific knowledge
<b>SC4-5WS</b>	collaboratively and individually produces a plan to investigate questions and problems
<b>SC4-6WS</b>	follows a sequence of instructions to safely undertake a range of investigation types, collaboratively and individually
<b>SC4-7WS</b>	processes and analyses data from a first-hand investigation and secondary sources to identify trends, patterns and relationships, and draw conclusions
<b>SC4-8WS</b>	selects and uses appropriate strategies, understanding and skills to produce creative and plausible solutions to identified problems
<b>SC4-9WS</b>	presents science ideas, findings and information to a given audience using appropriate scientific language, text types and representations
<b>SC4-10PW</b>	describes the action of unbalanced forces in everyday situations
<b>SC4-11PW</b>	discusses how scientific understanding and technological developments have contributed to finding solutions to problems involving energy transfers and transformations
<b>SC4-12ES</b>	describes the dynamic nature of models, theories and laws in developing scientific understanding of the Earth and solar system
<b>SC4-13ES</b>	explains how advances in scientific understanding of processes that occur within and on the Earth, influence the choices people make about resource use and management
<b>SC4-14LW</b>	relates the structure and function of living things to their classification, survival and reproduction
<b>SC4-15LW</b>	explains how new biological evidence changes people's understanding of the world
<b>SC4-16CW</b>	describes the observed properties and behaviour of matter, using scientific models and theories about the motion and arrangement of particles

<b>TE4-1DP</b>	designs, communicates and evaluates innovative ideas and creative solutions to authentic problems or opportunities
<b>TE4-2DP</b>	plans and manages the production of designed solutions
<b>TE4-3DP</b>	selects and safely applies a broad range of tools, materials and processes in the production of quality projects
<b>TE4-4DP</b>	designs algorithms for digital solutions and implements them in a general-purpose programming language

#### Knowledge and Understanding

<b>TE4-5AG</b>	investigates how food and fibre are produced in managed environments
<b>TE4-6FO</b>	explains how the characteristics and properties of food determine preparation techniques for healthy eating
<b>TE4-7DI</b>	explains how data is represented in digital systems and transmitted in networks
<b>TE4-8EN</b>	explains how force, motion and energy are used in engineered systems
<b>TE4-9MA</b>	investigates how the characteristics and properties of tools, materials and processes affect their use in designed solutions
